Secure private Enterprise connectivity to Public Cloud

CONNECTIVITY	Cloud Connect

Jio's Cloud Connect provides flexible, fast, secure and stable connectivity from edge location to Public Cloud. This is achieved using our scalable and high-speed MPLS VPN connectivity over highly redundant dual path network.

Cloud Connect ensures high network performance, prevents security breaches while accessing online Cloud operations. You can run traffic prioritisation, VRF and Quality of Service (QoS) related features through a corporate MPLS network that extends to the Cloud.

BENEFITS

Predictable Performance
Single network hop to enable you reach your Cloud applications with lowest latency

Security
No exposure to internet and MPLS VPN private network ensures full security

High Throughput
Multi Gigabit interconnects with Azure Cloud to ensure committed bandwidth and throughput performance

High Redundancy
Public Cloud connected through multiple paths to ensure high availability

FEATURES

Class of Service
Prioritization of business-critical and latency-sensitive traffic in a multi-application environment

Secure
Private and secured connectivity service with no exposure to internet or public networks

Scalable Bandwidth
Ability to upgrade up to 10 Gbps bandwidth that supports heavy data-consuming applications

Service Assurance
Enterprise-Grade Service Level Agreement for higher uptime and reliability

24x7 Assisted Care
Ready to service your needs at all times

Digital Self-Care
Intuitive digital portal to securely manage your account
