

# See how this IT Service Provider relied on Jio's Internet Leased Line to expand his business seamlessly

Kamlesh is an aspiring entrepreneur from Gurgaon. His IT Services business has grown rapidly in past 3 years.

With rapid growth in the business, today he has 25 employees, operating from an established corporate office.

His first challenge was to find the fast, reliable and secured internet connectivity to match the requirements of his growing team and the varied projects that he was handling.

To solve this, he reached out to a friend who is also a tech expert.

That is when he learned about Internet Leased Line or ILL and why his growing business needed an ILL versus just broadband.

He decided to opt for Jio ILL, which offered him not just reliable connectivity and high speeds but also the best value for money.

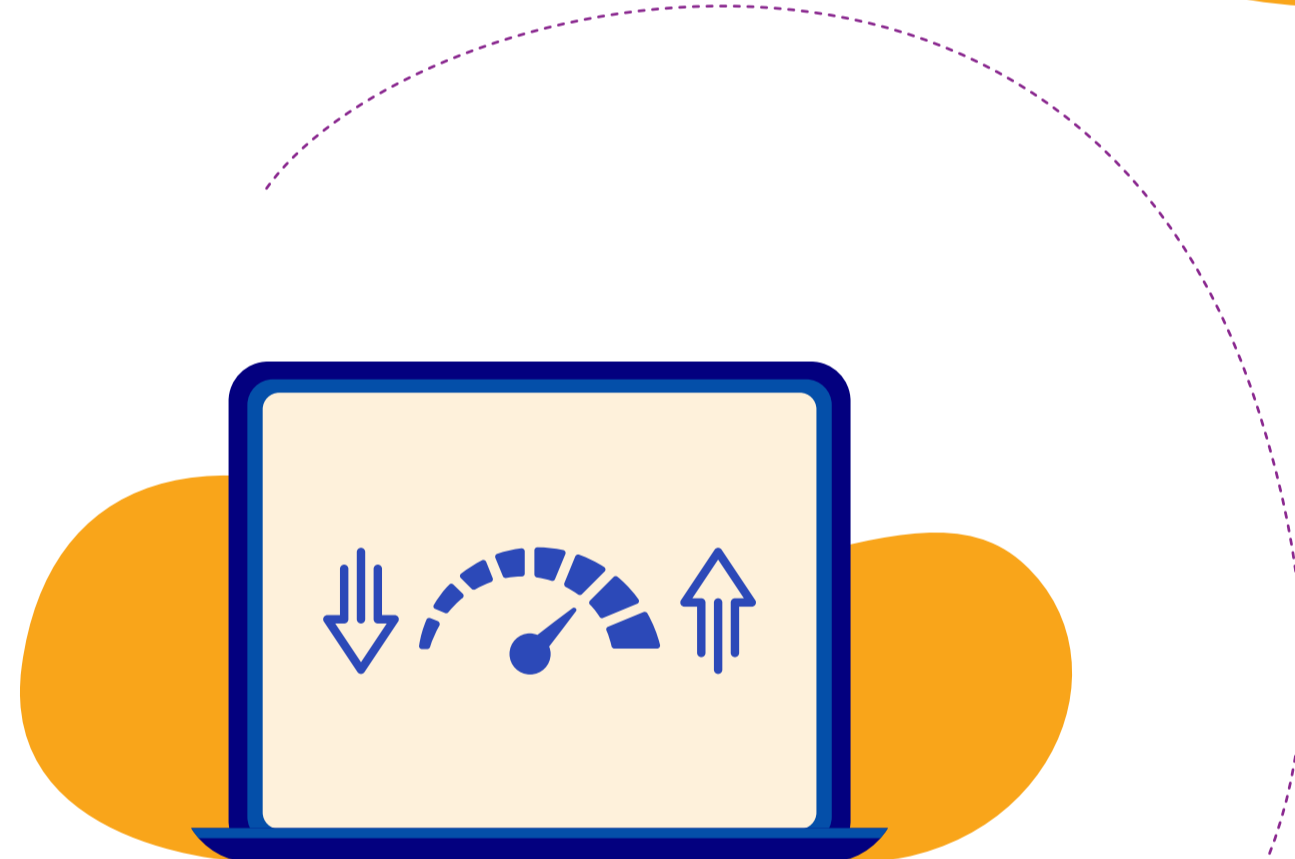

From the day he partnered with Jio, there has been no looking back! His business is ready to achieve new milestones.

Like Kamlesh, you can get a great jump start for your business with faster, reliable and secure connectivity from Jio. With **Jio ILL** you get-

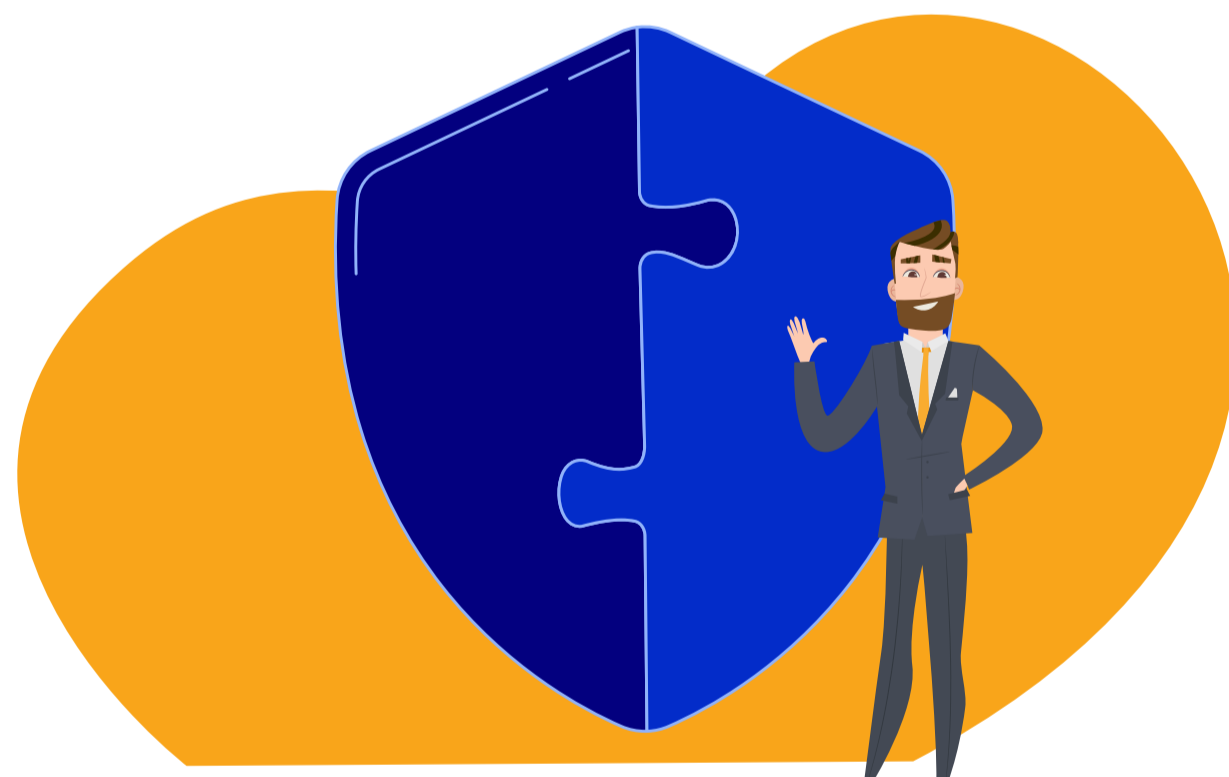

Enterprise-grade SLAs for reliable service

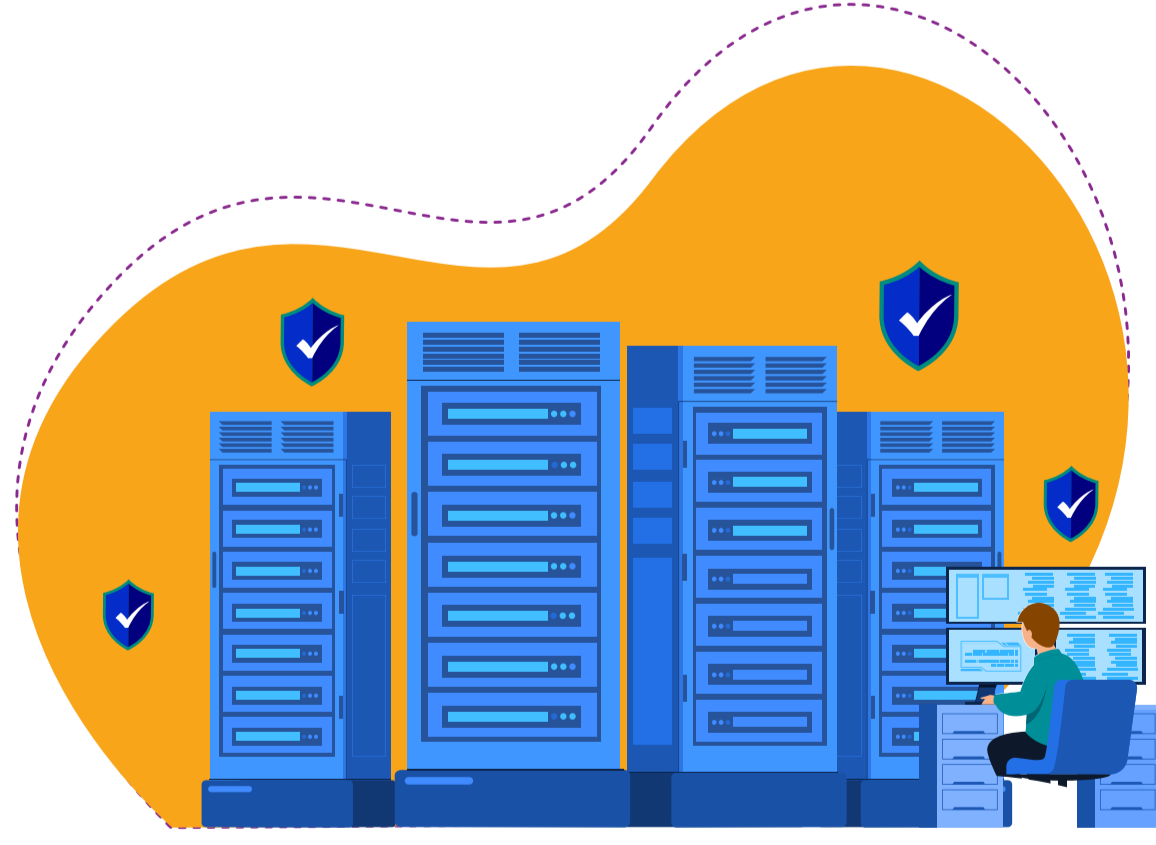

Superior browsing experience with symmetric upload and download speeds

Easy Bandwidth upgrade options as per your business need

Assurance of data privacy and security

Public static IPs to host content for customers, distributors and channel partner ecosystem

Secured connectivity with additional option of auto DDoS detection and mitigation capability

Widest reach with service availability across 1000+ cities

Get **Jio ILL**, a fast, reliable and secure internet connectivity for your growing business and give your business the edge it deserves.
