An outdoor LTE device enabling better signal reception with both private and public connectivity options

ATM

MOBILITY | **JioConnect**

In today's world, high-speed data over internet or on private connectivity have become the backbone of business operations. Businesses expect uninterrupted and stable connectivity at remote locations, where traditional access media like fiber or wire connectivity is often an issue.

To address such scenarios, we present 'JioConnect', an outdoor 4G LTE modem for offering high connectivity gain, on Jio networks. In instances where transaction of information is highly confidential, JioConnect with mobile VPN acts as a perfect solution. JioConnect enhances the experience of Mobile Data, and Mobile VPN services which enables smooth operation over the mobility network.

BENEFITS

Better Connectivity
Extend mobile connectivity indoors via. ethernet cable

Quick Roll Out
Easy and quick deployment for non-fiber/ remote locations

High Performance
Delivers high performance or applications with better data usage

On-ground Support
On-ground Jio trained engineers install and support ODCPE connectivity

FEATURES

LTE Device (ODCPE)
Highly durable reception device, waterproof design (IP65) suitable for outdoor installation and resistant against adverse climatic conditions

LAN Connectivity
Device capable of connecting with a simple Ethernet cable for high speed data with an all 4G network

Wireless Connectivity
Capability to extend mobile connectivity, through ethernet cable coming indoor

Remote Location Connectivity
Connect or reach the end devices at remote location, from the operational Hub

Secure Connectivity
Get end-to-end private network for critical data transactions

Quick Deployment
Easy and quick deployment for non-fiber or remote locations

Postpaid Billing
Available as a convenient postpaid billing option

Digital Self-Care
Access to an intuitive Self-Care portal to manage your service, including checking usage monitoring performance and more

Service Options

Parameter	Internet	Mobile VPN
Components	• Outdoor customer premise equipment (ODCPE) • Jio SIM with high speed internet	• Outdoor customer premise equipment (ODCPE) • Jio SIM with wireless VPN (Private APN) • MPLS link to hub site • IPSec Router (case to case basis)
Proposition	• High speed internet • Highly bundled data (GB) plans	• Reliable and secure private APN connectivity • Bundle high data (GB) plans • Highly bundled data (GB) plans
Few segments of applications	• Warehouses • Retail outlets • Small manufacturing units	• Bank branches & ATMs • Financial services – insurance & NBFCs • Third party ATM providers
