

The most cost-effective and scalable, fixed voice solution for your business.

VOICE & COLLABORATION

SIP Trunk

SIP (Session Initiation Protocol) Trunk is an IP-based voice & video service which allows you to make and receive calls through IP-PBXs.

SIP Trunk is more advanced as compared to traditional PRIs. It converges multiple voice channels in a single line, eliminating the need for separate physical media. It also allows you to increase and decrease channel as per your requirement, making it a highly scalable and flexible solution.

| BENEFITS | Avoid Bill Shocks Fixed monthly rental for unlimited domestic calling | Reduce Cost of Ownership No additional PRI cards for upgrades |
